## Biography

Fraser Nicoll is the founder of Uncommon Solutions, a software development company specialising in the Microsoft Power Platform.

During his career as a product manager in various industries (construction, education, finance and automotive), Fraser repeatedly saw the headaches that slow and unnecessarily arduous tasks caused in the workplace.

What could people be doing if they didn't have to follow these archaic processes? How could they pick up more responsibility, learn more, add more value and make an even bigger impact? Would having more time enable the causes these people serve drive positive change within society?

So, he decided to combine his years of experience and know-how to set up a business that would help others avoid these frustrations.

Common problems, Uncommon Solutions. There it was.

We create time!

With over 500 million new apps to be built in the next 5 years, Microsoft has revolutionised the way we create software applications and the way we could all work.

He asks...what would you do if I gave you back time?

## Session: Processes Reimagined, Time Regained: How automation could raise your value

The world of software and process automation is a scary place: if computers can do my job, what will I do? Will my job cease to exist? How will I put food on the table?

Nobody knows what this world looks like, but we all know that there are those who will thrive, and those who will be follow on behind. The truth is that the world of automation creates a huge opportunity for anyone who is willing to look at it with fresh eyes.

During this session , Fraser will give an overview of how Uncommon Solutions views the world of process automation, what the Microsoft Power Platform can do, and how Executive Assistants can become even more valuable to the businesses they serve, by enabling their executives to be even better than they already are.

You could become the linchpin at the centre of it all!

This is a light-hearted but informative presentation with time at the end for Fraser to answer any questions you may have. It should be fun!
